Jakarta Selatan, DKI Jakarta, 12230

Pharmacist and Bachelor of Pharmacy graduate from Universitas Ahmad Dahlan with comprehensive Pharmacist Internship (PKPA) experience across diverse sectors. Competent in clinical pharmacy services (hospital & Puskesmas), including prescription screening, compounding, dispensing, and Medication Therapy Monitoring (PTO). Well-versed in industrial QA/QC and production based on CPOB, alongside distribution management at PBF complying with CDOB standards. Possesses strong leadership skills as a former Pharmacy Laboratory Assistant, and is committed to advancing a career as a professional pharmacist focused on patient safety.

EDUCATION

Universitas Ahmad Dahlan	<i>Yogyakarta, Indonesia</i>
<i>Bachelor Degree Pharmacist GPA: 3,28/4.00</i>	<i>Sept 2020 – Nov 2024</i>
<i>Pharmacist Degree GPA: 3,89/4.00</i>	<i>Dec 2024 – May 2026</i>

WORK EXPERIENCE

Industrial Pharmacy Internship (PKPA) Lembaga Farmasi TNI Angkatan Udara (Lafi AU)	<i>Bandung, Indonesia Oct – Nov 2025</i>
- Analyzed and studied the implementation of Good Manufacturing Practices (CPOB/GMP) within industrial-scale pharmaceutical production. - Observed and evaluated the workflow of drug production lines and Quality Control (QC) processes for various dosage forms. - Studied the pharmaceutical documentation system, batch manufacturing records, and Quality Assurance (QA) protocols. - Participated in the evaluation of production processes and industrial warehouse inventory management.	
Government Pharmacy Internship (PKPA) Badan Pengawas Obat dan Makanan (BPOM) Pusat	<i>Jakarta, Indonesia Sept 2025</i>
- Studied the regulatory framework and evaluation procedures for enforcing Good Manufacturing Practices (CPOB/GMP) in the national pharmaceutical industry. - Monitored post-market surveillance operations, product safety evaluations, and quality control enforcement for distributed drugs. - Learned about drug registration processes, regulatory documentation, and quality standardization systems. - Analyzed the evaluation methods used to ensure compliance with storage and distribution standards across the supply chain.	
Hospital Pharmacy Internship (PKPA) Rumah Sakit Umum Pemerintah Dr. Kariadi	<i>Jakarta, Indonesia Jun - Jul 2025</i>
- Studied the comprehensive pharmaceutical supply chain management, including procurement, storage, and distribution in compliance with hospital accreditation standards. - Conducted ward rounds (visite) alongside the multidisciplinary healthcare team and developed Medication Therapy Monitoring (PTO/MTM) reports. - Performed prescription screening, validation, compounding, and dispensing to ensure patient safety and therapeutic accuracy.	
Pharmaceutical Wholesaler Internship (PKPA) Pedagang Besar Farmasi Salasa Barokah	<i>Yogyakarta, Indonesia Aug 2025</i>
- Studied and implemented Good Distribution Practices (CDOB/GDP) and Good Medical Device Distribution Practices (CDAKB) within the wholesale environment. - Managed drug receiving and storage workflows based on FEFO, FIFO, alphabetical order, and dosage form classifications. - Executed accurate inventory auditing (<i>stock opname</i>) and record-keeping to ensure seamless and compliant distribution tracking.	

Public Health Center Internship (PKPA) | Puskesmas Sewon 1

*Yogyakarta. Indonesia
Aug 2025*

- Performed prescription screening and fast-paced drug dispensing services for primary healthcare patients.
- Managed community-level pharmaceutical logistics, including stock planning, storage, and controlled substance (narcotics/psychotropics) reporting.
- Delivered counseling, drug information, and health education to promote rational drug use and patient safety.

Community Pharmacy Internship (PKPA) | Apotek Ramadhan

*Yogyakarta. Indonesia
May 2025*

- Conducted clinical screening, validation, and dispensing of prescriptions in accordance with Community Pharmacy Service Standards.
- Provided counseling and patient education (KIE) regarding safe, accurate, and rational drug use to improve patient compliance.
- Managed inventory control, monitored expiration dates, and ensured proper drug storage conditions to maintain product integrity.
